

Statement of Guiding Principles for Buildings and Sites

Policy No. 402.0

The Board of Education, School District No. 91 (Nechako Lakes), recognizes that District facilities and sites are essential dimensions of the educational program for students.

The Board expects that all buildings and sites should be constructed and maintained to ensure student, employee and public health and safety.

The Board expects that the standards of operation within the district will ensure that the facilities and sites will be operated in an efficient and cost-effective manner.

Further, the Board supports operational policies and procedures which will allow the schools and community to take maximum advantage of available facilities.
