

**Student Travel Allocations**

**Policy No. 305.5**

The Board of Education, School District No. 91 (Nechako Lakes), supports student participation in activities designed to promote greater awareness of society, government, post-secondary education, sports or culture.

For the purpose of subsidizing student travel costs and/or registration fees for such activities, the Board will allocate resources to schools on an annual basis.

In addition, the Board recognizes the need to foster district culture and to that end will provide limited financial assistance for specific events.

The Board also provides additional support for students traveling to provincial and national competitions as defined in the Regulations.
