

District Use of Toxic Materials

Policy No. 402.5

The Board of Education, School District No. 91 (Nechako Lakes), recognizes the importance of a safe physical environment for students and the public who utilize its grounds and facilities. The Board will endeavor to ensure that all products used to maintain the grounds and facilities are safe. If there is any potential danger from such use, suitable notice will be given.

The Board expects that if agencies other than the school district are anticipating the use of toxic materials, then such information should be brought to the Board in a timely manner.
