

Board/Authority Authorized (BAA) Courses

Policy No. 304.4

The Board of Education, School District No. 91 (Nechako Lakes), recognizes that there may be a need for a variety of locally relevant courses, not available from the Ministry, to meet the needs of schools and their communities while offering choice and flexibility for students.

The Board shall review the courses in use in the district as needed. The Board will authorize each new BAA course and ensure that it meets the BAA course requirements. The Board will also ensure that any previous Locally Developed Course relevant to current student needs and interests, be converted to a BAA course when schools determine a course on the list fits their needs. The Board will follow Ministry of Education procedures for BAA approval to obtain the course codes.

The Board of Education supports and encourages the development of Board/Authority Authorized courses to meet local needs and interests.
